AI Book Cover Generator

Models

GPT Image 2 16 credits

Prompt

Enhance · 2

A moody fantasy book cover illustration, a lone hooded figure on a windswept cliff at dusk, a stormy sea and a distant glowing lighthouse beyond, cinematic lighting, deep teal and amber palette, clean negative space at the top, master illustrator quality, no text

epic fantasy, dragon over a misty tower

dark thriller, noir alley, one red accent

cozy mystery, snowy bookshop window

Your book cover

Generated from your prompt

How to make a book cover with the AI book cover generator

Three steps to cover art with the AI book cover generator, from a blank prompt to an illustration for your book.

1

Describe your cover

Write the genre, the scene, and the mood — for example, a lone lighthouse under a stormy dusk sky, or a snowy village bookshop window. The more specific the prompt, the closer the cover art comes to your story.

2

Pick a model and generate

Choose GPT Image 2 or Nano Banana 2 in the AI book cover generator, then generate. Each generation spends credits, so you sign in first and every run stays intentional.

3

Refine, then add your title

Adjust the scene or palette in your prompt and generate again until the art fits. Then add your title and author name yourself — the tool paints the illustration, not the text.
